

# Kevin Metrocavage

International Space Station Operations Manager  
NASA Headquarters  
300 E. Street SW, Washington, D.C. 20546

March 2021

Kevin Metrocavage currently serves as the Human Exploration and Operations Mission Directorate (HEOMD) Operations Manager, with specialty focus on the International Space Station (ISS). In this role, he is responsible for maintaining overall situational awareness of the planning and execution of ISS complex operations for HEOMD at NASA Headquarters (HQ) in Washington, DC. Metrocavage manages ISS real-time and contingency support from the NASA HQ Space Operations Center (SOC) and provides input and status to Directorate and ISS Division leadership as well as external agencies as appropriate. Additionally, he will integrate operations support from the HQ SOC for the upcoming Artemis missions supporting NASA's return to the moon.

Previously, Metrocavage worked in Mission Control at NASA Johnson Space Center in Houston, TX where he served as a Flight Controller, Instructor, and Manager for the ISS Motion Control Systems group. As an Attitude Determination and Control Officer (ADCO), Metrocavage planned, coordinated, monitored, and executed ISS maneuvers in support of a variety of complex operations. As Instructor, Metrocavage was responsible for training astronauts, cosmonauts, and peers on ISS systems.

Metrocavage supported 18 ISS Assembly Missions and over 58 ISS Expeditions from Houston, Washington D.C. and internationally in Moscow, Russia. NASA has recognized Metrocavage with multiple individual and team awards, most notably the NASA Spaceflight Awareness Award in 2011 which is one of the highest awards presented to NASA and industry personnel.

Metrocavage is originally from Pennsylvania. He earned his Bachelor's degree in Aeronautical & Astronautical Engineering from Purdue University. He has served on the University Alumni Board of Directors and is currently Past-President of their Engineering Alumni Board of Directors. Metrocavage also worked as a U.S. Space Camp Counselor and continues to have a passion for STEM engagement, family, faith, sports, science-fiction, space exploration and human spaceflight.
